Evidence Tracking Challenges

- Thousands of pieces of evidence across many locations
- Manually keying each of the items into a paper-based system
- Need for property movement
- Need for property query and reporting
- Need for digital image storage
- Need for timely updates and disposition changes

Project Objectives

- Authorized Personnel to key-in property and assign a bar code number to that property
- System to validate the report number enter against the internal system
- Validate property codes during entry to ensure accuracy
- Support property and evidence moving individually or by bulk

Objectives cont'd

Movements:

- Check In – Either checked in by property custodian or office that checked it out
- Check Out - Checked out to officers, detectives, Dept. of Public safety, Courts, or other authorized personnel
- Movement from one location to another within the facility
- Released and disposed

Objectives cont'd

- Physical Inventory
- Image Capture of related activities
- Electronic signature capture
- Batch or wireless updates from remote areas
- Reporting capabilities
